Dad

I MADE THIS  
FOR YOU THANKS!!

## copper tape circuit prototype

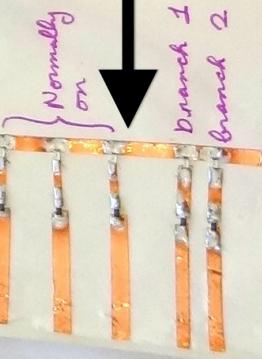

global in (

Reader:

- D0: global out
- D1: global LED
- D2: branch 2 LED
- D3: branch 3 LED
- D4: branch 2 In
- D5: branch 3 In
- A6: motion detect in

} triggered flower

tabs to clip  
external  
components

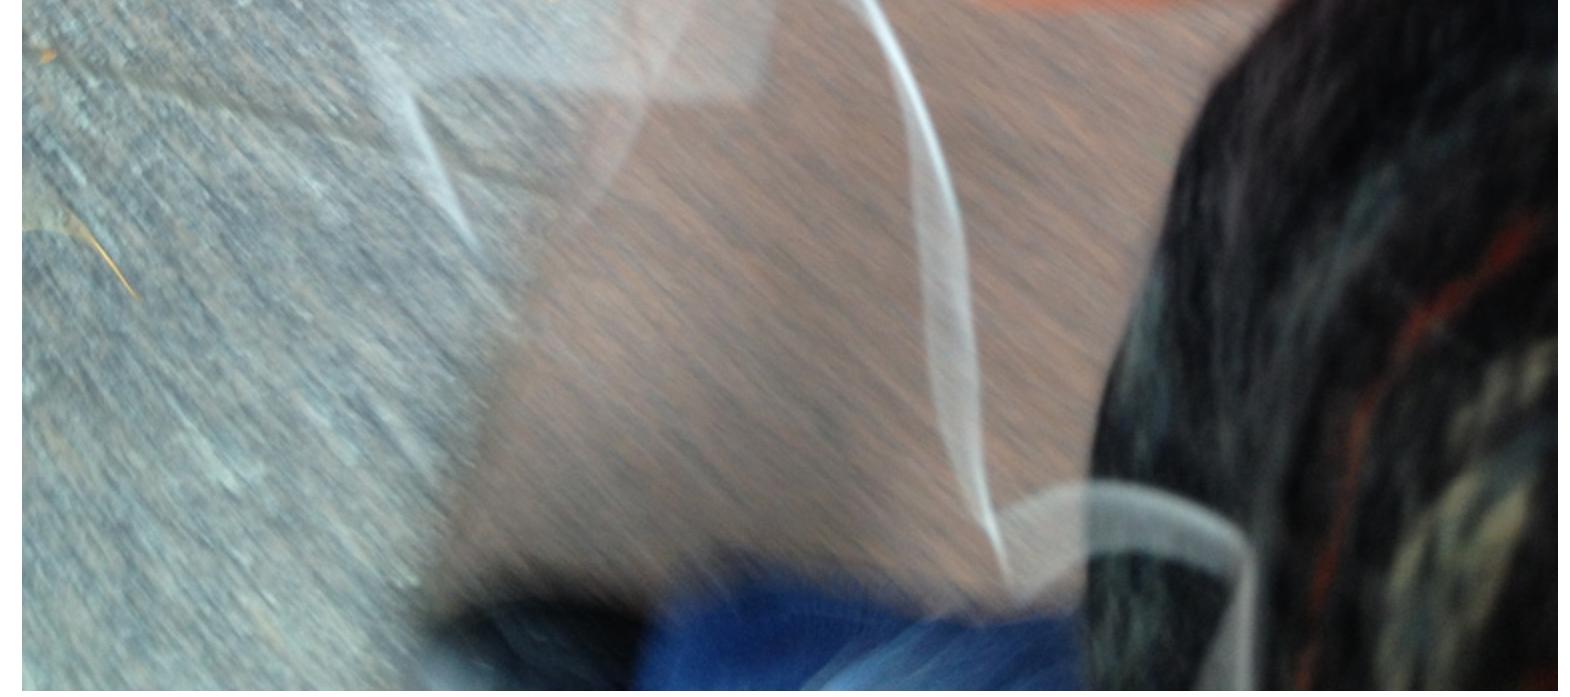

Attiny 84: 10 pins total  
 1 - local input → so that one branch fails to not  
 2 - global input - all branches fail at once.  
 local output 3, 4, 5  
 ↳ tree grows out in phases  
 ↳ randomly some branches  
 brighten, wait for period, others  
 will brighten, wait again  
 and continue until all  
 branches are lit.  
 ↳ result is that growth  
 is different every time (number  
 you wait long enough for  
 maximum fill).

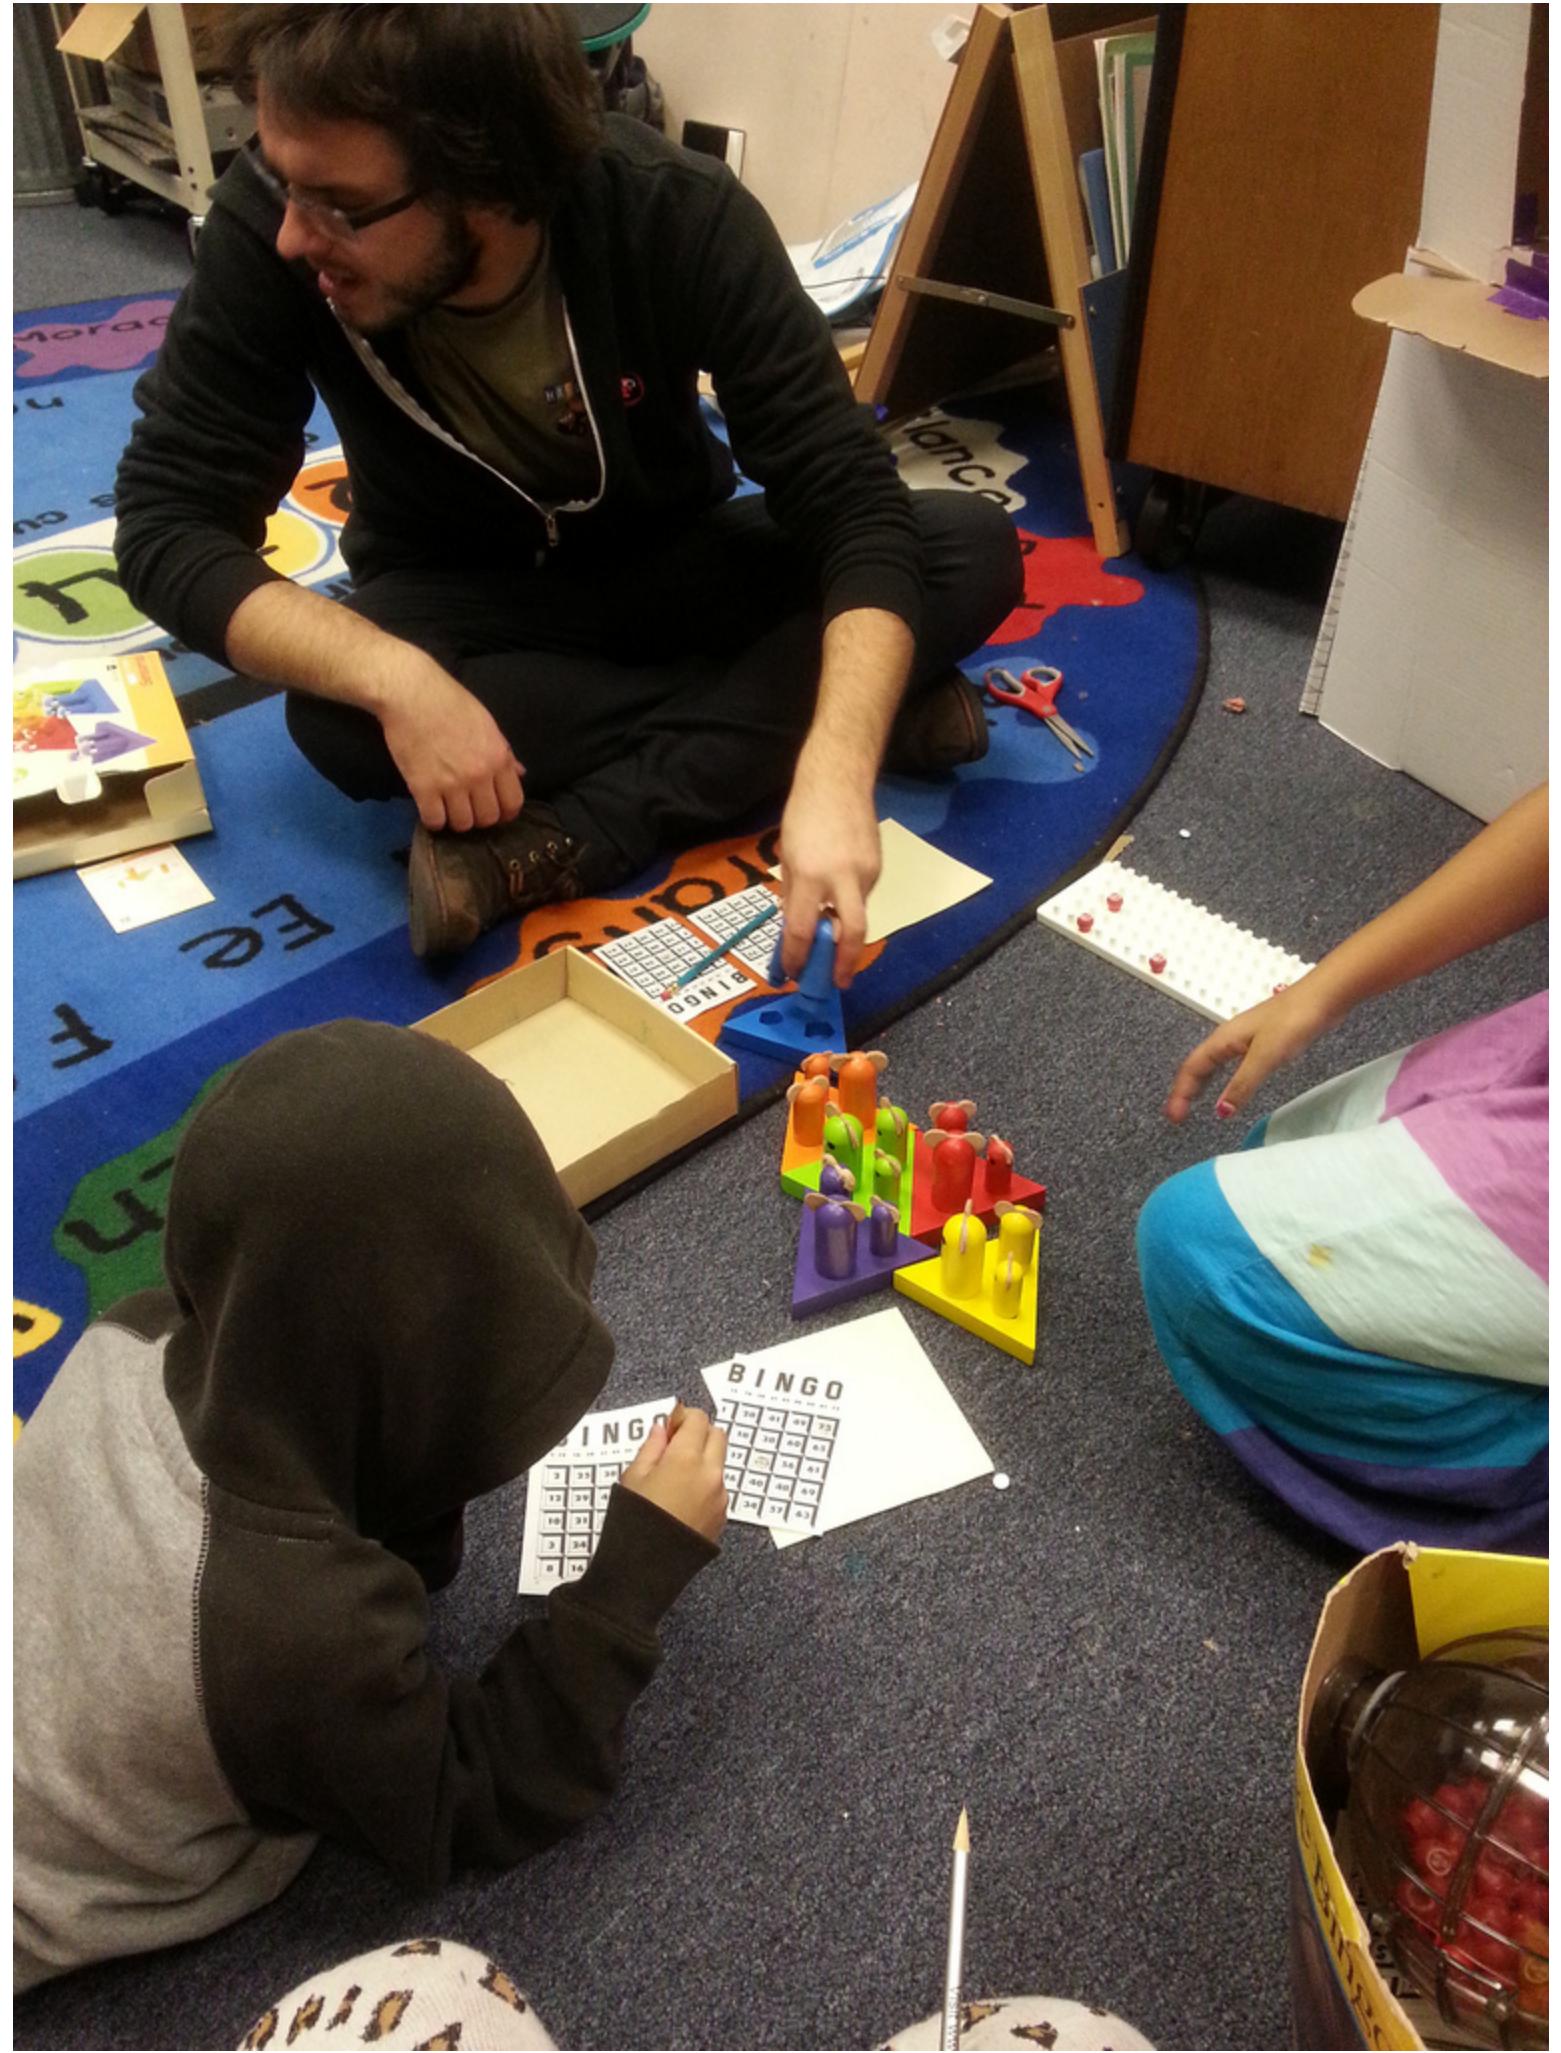

comments  
and notes!

5-7 : Always flickering flowers  
 ↳ mostly on, sometimes off  
 8,9,10 : blooms in sequence when triggered  
 by presence.

Main lines : GND, global sensor, Vcc
